

# FpML® Editor/Viewer

## 1. Information

The FpML Editor/Viewer is available free to ISDA Members, and is purchasable by Non-Members. You can login to download or purchase the tool at the [Editor/Viewer Download Page](#) (fpmleditor.html) .

**NOTE: The login for ISDA Members has changed, you must now login using your ISDA Members Portal account, NOT your company firm ID/password. If you have not setup your own individual ISDA Members Portal account, please click [here](http://eseries.isda.org/Source/Join/index.cfm) (http://eseries.isda.org/Source/Join/index.cfm) .**

The FpML Editor/Viewer allows FpML trades to be created from scratch, loaded from a local file, or loaded from the World Wide Web. Based on the Internet Explorer web browser and Microsoft XSLT, the editor provides high quality editing features, such as drop-down lists, radio buttons and checkboxes, and collapsing/expanding sections to support editing of complex trades. FpML trades created in the editor can be saved to a local file or uploaded to a web server. The editor is template-driven and uses CSS stylesheets for formatting to allow easy customization and rapid incorporation of new products and product features.

This version of the Editor/Viewer covers new products and product features introduced in FpML 4.4. This includes:

- Support for New CDS products (options on CDS).
- Support for New Equity products (new variations on variance swaps, dividend swaps, and correlation swaps, for example dispersion variance swaps)
- Support for Commercial loans messages
- There is also preliminary support for FpML 5.0.
